Murauen im Grazer Feld, Leibnitzer Feld und Murauen zwischen Spielfeld und Sicheldorf

Factsheet filled with data from Biogenetic reservesdata set

Site identification	
Biogenetic reserves code in database	AT930056
Surface area (ha)	11000.00
Length	
Complex name	
District name	
Date form compilation date (yyyyMM)	199709
Surface area (ha)	
Date proposed	1994
Site designation date	1995

Designation information				
Source data set	Designation code	Designation name (Original)	Designation name (English)	Designation name (French)
Common Database on Designated Areas (CDDA)	IN01	Biogenetic Reserve (Council of Europe)	Biogenetic Reserve (Council of Europe)	

Project ID:
Project title:

Monitoring activities

Location information					
Country	Austria			Regional administrative codes	

Site contact authorities	
Respondent	
Author	Dr. Erwin Kolmanitsch, Dr. Werner Ilzer Stiftung Europäisches Naturerbe - EURONATUR Brockmanngasse 53 A-8010 Graz
Manager	Bezirkshauptmannschaft Graz - Umgebung, Leibnitz, Radkersburg; Slovenija

Description	
Quality	
Vulnerability	
Designation	Biogenetic Reserve (Council of Europe)
Owner	Mostly privat
Documentation	
Habitat types	Flood plain forests; backwater; part of an unpounded free flowing river section (from Spielfeld downstream) all being rare living space of endangered plants and animals.
Flora	
Fauna	The high variety of insect populations is not included; for more information see publication list
Potential vegetation	
Management plan	in progress: protection proposed: planing, management and restoration

Ecological information: Fauna and Flora												
Species scientific name	Species group	Resident	Breeding	Winter.	Staging	Popul.	Species	Nesting	Conserv.	Isolation	Global status	Species status
Anguilla anguilla	Fishes											not native to the site

Cobitis taenia	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Gobio albipinnatus	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Gymnocephalus cernua	Fishes												considered threatened (rare, vulnerable, in danger) at national level

Gymnocephalus schraetzer	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Hucho hucho	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Leuciscus souffia agassizi	Fishes												considered threatened (rare, vulnerable, in danger) at national level

Misgurnus fossilis	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Oncorhynchus mykiss	Fishes												not native to the site
Rhodeus sericeus amarus	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Stizostedion lucioperca	Fishes												considered threatened (rare, vulnerable, in danger) at national level

Zingel zingel	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Bombina bombina	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Bombina variegata	Amphibians												considered threatened (rare, vulnerable, in danger) at national level

Bufo viridis	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Coronella austriaca	Reptiles												considered threatened (rare, vulnerable, in danger) at national level
Elaphe longissima	Reptiles												considered threatened (rare, vulnerable, in danger) at national level

Hyla arborea	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Lacerta agilis	Reptiles												characteristic of the biotope
Natrix tessellata	Reptiles												considered threatened (rare, vulnerable, in danger) at national level
Pelobates fuscus	Amphibians												considered threatened (rare, vulnerable, in danger) at national level

Podarcis muralis	Reptiles												considered threatened (rare, vulnerable, in danger) at national level
Rana arvalis	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Rana dalmatina	Amphibians												considered threatened (rare, vulnerable, in danger) at national level

Rana esculenta	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Rana ridibunda	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Rana temporaria	Amphibians												considered threatened (rare, vulnerable, in danger) at national level

Triturus carnifex	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Accipiter gentilis	Birds												considered threatened (rare, vulnerable, in danger) at national level
Accipiter nisus	Birds												considered threatened (rare, vulnerable, in danger) at national level
Acrocephalus palustris	Birds												characteristic of the biotope

Acrocephalus schoenobaenus	Birds											migratory on the site
Actitis hypoleucos	Birds											considered threatened (rare, vulnerable, in danger) at national level
Aegithalos caudatus	Birds											characteristic of the biotope
Alauda arvensis	Birds											characteristic of the biotope
Alcedo atthis	Birds											considered threatened (rare, vulnerable, in danger) at national level
Anas acuta	Birds											migratory on the site

Anas clypeata	Birds											migratory on the site
Anas crecca	Birds											considered threatened (rare, vulnerable, in danger) at national level
Anas penelope	Birds											migratory on the site
Anas platyrhynchos	Birds											predominant on the site
Anas querquedula	Birds											migratory on the site
Anas strepera	Birds											migratory on the site
Anser anser	Birds											migratory on the site
Anser fabalis	Birds											migratory on the site

Anthus pratensis	Birds											migratory on the site
Anthus spinoletta	Birds											migratory on the site
Anthus trivialis	Birds											characteristic of the biotope
Apus apus	Birds											characteristic of the biotope
Aquila clanga	Birds											migratory on the site
Ardea cinerea	Birds											considered threatened (rare, vulnerable, in danger) at national level
Ardea purpurea	Birds											migratory on the site
Arenaria interpres	Birds											migratory on the site

Asio otus	Birds												charac teristic of the biotop e
Aythya ferina	Birds												migrat ory on the site
Aythya fuligula	Birds												migrat ory on the site
Aythya marila	Birds												migrat ory on the site
Aythya nyroca	Birds												migrat ory on the site
Bombycilla garrulus	Birds												migrat ory on the site
Botaurus stellaris	Birds												migrat ory on the site
Bucephala clangula	Birds												migrat ory on the site

Buteo buteo	Birds												considered threatened (rare, vulnerable, in danger) at national level
Calidris alba	Birds												migratory on the site
Calidris alpina	Birds												migratory on the site
Calidris canutus	Birds												migratory on the site
Calidris ferruginea	Birds												migratory on the site
Calidris minuta	Birds												migratory on the site
Calidris temminckii	Birds												migratory on the site
Carduelis cannabina	Birds												migratory on the site

Carduelis carduelis	Birds												charac teristic of the biotop e
Carduelis chloris	Birds												charac teristic of the biotop e
Carduelis spinus	Birds												migrat ory on the site
Casarca ferruginea	Birds												migrat ory on the site
Certhia brachydactyla	Birds												charac teristic of the biotop e
Certhia familiaris	Birds												charac teristic of the biotop e
Charadrius dubius	Birds												consid ered threat ened (rare, vulner able, in dange r) at nation al level

Charadrius hiaticula	Birds											migratory on the site
Chlidonias leucopterus	Birds											migratory on the site
Chlidonias niger	Birds											migratory on the site
Ciconia ciconia	Birds											considered threatened (rare, vulnerable, in danger) at national level
Ciconia nigra	Birds											considered threatened (rare, vulnerable, in danger) at national level

Cinclus cinclus	Birds												considered threatened (rare, vulnerable, in danger) at national level
Circus aeruginosus	Birds												migratory on the site
Circus cyaneus	Birds												migratory on the site
Circus macrourus	Birds												migratory on the site
Clangula hyemalis	Birds												migratory on the site
Coccothraustes coccothraustes	Birds												characteristic of the biotope

Columba oenas	Birds												considered threatened (rare, vulnerable, in danger) at national level
Columba palumbus	Birds												characteristic of the biotope
Corvus frugilegus	Birds												migratory on the site
Corvus monedula	Birds												characteristic of the biotope
Coturnix coturnix	Birds												migratory on the site
Cuculus canorus	Birds												characteristic of the biotope
Cygnus cygnus	Birds												migratory on the site
Cygnus olor	Birds												not native to the site

Delichon urbica	Birds												charac teristic of the biotop e
Dendrocopos major	Birds												charac teristic of the biotop e
Dendrocopos medius	Birds												consid ered threat ened (rare, vulner able, in dange r) at nation al level
Dendrocopos minor	Birds												charac teristic of the biotop e
Dendrocopos syriacus	Birds												consid ered threat ened (rare, vulner able, in dange r) at nation al level

Dryocopus martius	Birds												charac teristic of the biotop e
Egretta alba	Birds												migrat ory on the site
Emberiza citrinella	Birds												charac teristic of the biotop e
Emberiza schoeniclus	Birds												migrat ory on the site
Erithacus rubecula	Birds												predo minant on the site
Falco columbarius	Birds												migrat ory on the site
Falco naumanni	Birds												consid ered threat ened (rare, vulner able, in dange r) at nation al level
Falco peregrinus	Birds												migrat ory on the site

Falco subbuteo	Birds												considered threatened (rare, vulnerable, in danger) at national level
Falco tinnunculus	Birds												considered threatened (rare, vulnerable, in danger) at national level
Falco vespertinus	Birds												migratory on the site
Ficedula albicollis	Birds												characteristic of the biotope
Ficedula hypoleuca	Birds												characteristic of the biotope
Fringilla coelebs	Birds												predominant on the site

Fringilla montifringilla	Birds											migratory on the site
Fulica atra	Birds											considered threatened (rare, vulnerable, in danger) at national level
Gallinago gallinago	Birds											migratory on the site
Gallinago media	Birds											migratory on the site
Gallinula chloropus	Birds											considered threatened (rare, vulnerable, in danger) at national level
Garrulus glandarius	Birds											characteristic of the biotope

Gavia arctica	Birds											migratory on the site
Gavia immer	Birds											migratory on the site
Gavia stellata	Birds											migratory on the site
Gelochelidon nilotica	Birds											migratory on the site
Glareola pratincola	Birds											migratory on the site
Grus grus	Birds											migratory on the site
Haliaeetus albicilla	Birds											migratory on the site
Hippolais icterina	Birds											migratory on the site
Hirundo rustica	Birds											characteristic of the biotope
Ixobrychus minutus	Birds											migratory on the site

Jynx torquilla	Birds											considered threatened (rare, vulnerable, in danger) at national level
Lanius collurio	Birds											characteristic of the biotope
Lanius excubitor	Birds											migratory on the site
Lanius minor	Birds											migratory on the site
Larus argentatus	Birds											migratory on the site
Larus canus	Birds											migratory on the site
Larus fuscus	Birds											migratory on the site
Larus marinus	Birds											migratory on the site

Larus melanocephalus	Birds											migratory on the site
Larus minutus	Birds											migratory on the site
Larus ridibundus	Birds											migratory on the site
Limosa limosa	Birds											migratory on the site
Locustella fluviatilis	Birds											considered threatened (rare, vulnerable, in danger) at national level
Locustella luscinioides	Birds											migratory on the site
Locustella naevia	Birds											migratory on the site
Lullula arborea	Birds											migratory on the site

Luscinia megarhynchos	Birds												considered threatened (rare, vulnerable, in danger) at national level
Lymnocyptes minimus	Birds												migratory on the site
Melanitta fusca	Birds												migratory on the site
Melanitta nigra	Birds												migratory on the site
Mergus albellus	Birds												migratory on the site
Mergus merganser	Birds												migratory on the site
Mergus serrator	Birds												migratory on the site
Milvus migrans	Birds												migratory on the site

Milvus milvus	Birds											migratory on the site
Motacilla alba	Birds											characteristic of the biotope
Motacilla cinerea	Birds											characteristic of the biotope
Muscicapa striata	Birds											characteristic of the biotope
Netta rufina	Birds											migratory on the site
Numenius arquata	Birds											migratory on the site
Numenius phaeopus	Birds											migratory on the site
Nycticorax nycticorax	Birds											migratory on the site
Oenanthe oenanthe	Birds											migratory on the site

Oriolus oriolus	Birds												charac teristic of the biotop e
Pandion haliaetus	Birds												migrat ory on the site
Parus caeruleus	Birds												charac teristic of the biotop e
Parus cristatus	Birds												migrat ory on the site
Parus major	Birds												predo minant on the site
Parus montanus	Birds												migrat ory on the site
Parus palustris	Birds												charac teristic of the biotop e
Passer domesticus	Birds												charac teristic of the biotop e
Passer montanus	Birds												charac teristic of the biotop e

Perdix perdix	Birds																					considered threatened (rare, vulnerable, in danger) at national level	
Pernis apivorus	Birds																						considered threatened (rare, vulnerable, in danger) at national level
Phalacrocorax carbo	Birds																						migratory on the site
Phalacrocorax pygmeus	Birds																						migratory on the site
Phalaropus fulicarius	Birds																						migratory on the site
Phalaropus lobatus	Birds																						migratory on the site

Phasianus colchicus	Birds												not native to the site
Philomachus pugnax	Birds												migratory on the site
Phoenicurus ochruros	Birds												characteristic of the biotope
Phoenicurus phoenicurus	Birds												considered threatened (rare, vulnerable, in danger) at national level
Phylloscopus collybita	Birds												predominant on the site
Phylloscopus sibilatrix	Birds												characteristic of the biotope
Phylloscopus trochilus	Birds												characteristic of the biotope

Pica pica	Birds												charac teristic of the biotop e
Picus canus	Birds												charac teristic of the biotop e
Picus viridis	Birds												charac teristic of the biotop e
Platalea leucorodia	Birds												migrat ory on the site
Pluvialis apricaria	Birds												migrat ory on the site
Pluvialis squatarola	Birds												migrat ory on the site
Podiceps auritus	Birds												migrat ory on the site
Podiceps cristatus	Birds												consid ered threat ened (rare, vulner able, in dange r) at nation al level

Podiceps grisegena	Birds											migratory on the site
Podiceps nigricollis	Birds											migratory on the site
Porzana parva	Birds											migratory on the site
Porzana porzana	Birds											migratory on the site
Prunella modularis	Birds											migratory on the site
Pyrrhula pyrrhula	Birds											migratory on the site
Rallus aquaticus	Birds											migratory on the site
Regulus ignicapillus	Birds											characteristic of the biotope
Regulus regulus	Birds											characteristic of the biotope
Remiz pendulinus	Birds											characteristic of the biotope

Riparia riparia	Birds											migratory on the site
Rissa tridactyla	Birds											migratory on the site
Saxicola rubetra	Birds											migratory on the site
Saxicola torquata	Birds											characteristic of the biotope
Scolopax rusticola	Birds											migratory on the site
Serinus serinus	Birds											characteristic of the biotope
Sitta europaea	Birds											characteristic of the biotope
Somateria mollissima	Birds											migratory on the site
Stercorarius parasiticus	Birds											migratory on the site
Sterna caspia	Birds											migratory on the site

Sterna hirundo	Birds											migratory on the site
Streptopelia decaocto	Birds											characteristic of the biotope
Streptopelia turtur	Birds											characteristic of the biotope
Strix aluco	Birds											characteristic of the biotope
Sturnus vulgaris	Birds											predominant on the site
Sylvia atricapilla	Birds											predominant on the site
Sylvia borin	Birds											considered threatened (rare, vulnerable, in danger) at national level

Sylvia communis	Birds												charac teristic of the biotop e
Sylvia curruca	Birds												migrat ory on the site
Tachybaptus ruficollis	Birds												consid ered threat ened (rare, vulner able, in dange r) at nation al level
Tringa erythropus	Birds												migrat ory on the site
Tringa glareola	Birds												migrat ory on the site
Tringa nebularia	Birds												migrat ory on the site
Tringa ochropus	Birds												migrat ory on the site

Tringa stagnatilis	Birds												considered threatened (rare, vulnerable, in danger) at national level
Tringa totanus	Birds												migratory on the site
Troglodytes troglodytes	Birds												characteristic of the biotope
Turdus iliacus	Birds												migratory on the site
Turdus merula	Birds												predominant on the site
Turdus philomelos	Birds												predominant on the site
Turdus pilaris	Birds												migratory on the site

Turdus viscivorus	Birds											charac teristic of the biotop e
Upupa epops	Birds											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Vanellus vanellus	Birds											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Lepus capensis	Mammals											consid ered threat ened (rare, vulner able, in dange r) at nation al level

Lutra lutra	Mammals												considered threatened (rare, vulnerable, in danger) at national level
Martes martes	Mammals												characteristic of the biotope
Muscardinus avellanarius	Mammals												characteristic of the biotope
Mustela nivalis	Mammals												characteristic of the biotope
Mustela putorius	Mammals												considered threatened (rare, vulnerable, in danger) at national level

Rattus norvegicus	Mammals											charac teristic of the biotop e
Umbra krameri	Fishes											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Acipenser ruthenus	Fishes											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Esox lucius	Fishes											consid ered threat ened (rare, vulner able, in dange r) at nation al level

Cyprinus carpio	Fishes												status not given
Abramis brama	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Abramis sapa	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Alburnus alburnus	Fishes												considered threatened (rare, vulnerable, in danger) at national level

Alburnoides bipunctatus	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Blicca bjoerkna	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Chondrostoma nasus	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Ctenopharyngodon idella	Fishes												not native to the site

Gobio gobio	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Leuciscus cephalus	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Leuciscus idus	Fishes												considered threatened (rare, vulnerable, in danger) at national level

Leuciscus leuciscus	Fishes																considered threatened (rare, vulnerable, in danger) at national level	
Pelecus cultratus	Fishes																	considered threatened (rare, vulnerable, in danger) at national level
Rutilus rutilus	Fishes																	considered threatened (rare, vulnerable, in danger) at national level

Tinca tinca	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Vimba vimba	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Noemacheilus barbatulus	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Ictalurus nebulosus	Fishes												not native to the site

Silurus glanis	Fishes													considered threatened (rare, vulnerable, in danger) at national level
Lota lota	Fishes													considered threatened (rare, vulnerable, in danger) at national level
Lepomis gibbosus	Fishes													not native to the site
Perca fluviatilis	Fishes													considered threatened (rare, vulnerable, in danger) at national level

Cyprinus auratus	Fishes											not native to the site
Scardinius erythrophthalmus	Fishes											considered threatened (rare, vulnerable, in danger) at national level
Cyprinus carassius	Fishes											considered threatened (rare, vulnerable, in danger) at national level
Bufo bufo	Amphibians											characteristic of the biotope

Triturus vulgaris	Amphibians												considered threatened (rare, vulnerable, in danger) at national level
Anguis fragilis	Reptiles												considered threatened (rare, vulnerable, in danger) at national level
Natrix natrix	Reptiles												considered threatened (rare, vulnerable, in danger) at national level
Apodemus flavicollis	Mammals												predominant on the site

Apodemus sylvaticus	Mammals											charac teristic of the biotop e
Arvicola terrestris	Mammals											charac teristic of the biotop e
Capreolus capreolus	Mammals											charac teristic of the biotop e
Cervus elaphus	Mammals											migrat ory on the site
Clethrionomys glareolus	Mammals											predo minant on the site
Crocidura leucodon	Mammals											consid ered threat ened (rare, vulner able, in dange r) at nation al level

Erinaceus concolor	Mammals												considered threatened (rare, vulnerable, in danger) at national level
Meles meles	Mammals												considered threatened (rare, vulnerable, in danger) at national level
Micromys minutus	Mammals												considered threatened (rare, vulnerable, in danger) at national level
Microtus agrestis	Mammals												characteristic of the biotope

Microtus arvalis	Mammals											charac teristic of the biotop e
Mustela erminea	Mammals											charac teristic of the biotop e
Neomys anomalus	Mammals											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Neomys fodiens	Mammals											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Ondatra zibethicus	Mammals											charac teristic of the biotop e

Sciurus vulgaris	Mammals												charac teristic of the biotop e
Sorex araneus	Mammals												charac teristic of the biotop e
Sorex minutus	Mammals												charac teristic of the biotop e
Sus scrofa	Mammals												migrat ory on the site
Talpa europaea	Mammals												charac teristic of the biotop e
Vulpes vulpes	Mammals												charac teristic of the biotop e
Acanthis flammea	Birds												migrat ory on the site
Motacilla flava flava	Birds												migrat ory on the site
Motacilla flava flavissima	Birds												migrat ory on the site

Salmo trutta fario	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Pitymys subterraneus	Mammals												characteristic of the biotope
Barbus meridionalis petenyi	Fishes												considered threatened (rare, vulnerable, in danger) at national level
Peucedanum verticillare	Flowering Plants												characteristic of the biotope

Oenanthe aquatica	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Chaerophyllum bulbosum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Berula erecta	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Peucedanum palustre	Flowering Plants												characteristic of the biotope

Aristolochia clematitis	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Omphalodes scorpioides	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Rorippa amphibia	Flowering Plants												characteristic of the biotope
Nasturtium officinale	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Ceratophyllum demersum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Hippuris vulgaris	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Myriophyllum spicatum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Myriophyllum verticillatum	Flowering Plants											considered threatened (rare, vulnerable, in danger) at national level
Nuphar lutea	Flowering Plants											considered threatened (rare, vulnerable, in danger) at national level
Ranunculus circinatus	Flowering Plants											characteristic of the biotope
Hottonia palustris	Flowering Plants											considered threatened (rare, vulnerable, in danger) at national level

Galium elongatum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Limosella aquatica	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Daphne mezereum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Myricaria germanica	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Ulmus laevis	Flowering Plants												characteristic of the biotope
Ulmus minor	Flowering Plants												characteristic of the biotope
Butomus umbellatus	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Alisma lanceolatum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Galanthus nivalis	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Narcissus radiiflorus	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Arum maculatum	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Iris pseudacorus	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Lemna trisulca	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Spirodela polyrhiza	Flowering Plants												characteristic of the biotope

Scirpus lacustris ssp. lacustris	Flowering Plants											characteristic of the biotope
Carex pseudocyperus	Flowering Plants											considered threatened (rare, vulnerable, in danger) at national level
Scilla bifolia	Flowering Plants											characteristic of the biotope
Erythronium dens-canis	Flowering Plants											considered threatened (rare, vulnerable, in danger) at national level

Anacamptis pyramidalis	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Cephalanthera rubra	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Dactylorhiza fuchsii	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Epipactis helleborine	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Ophrys sphegodes	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Orchis morio	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Orchis tridentata	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Orchis ustulata	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Platanthera bifolia	Flowering Plants												characteristic of the biotope
Listera ovata	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level

Neottia nidus-avis	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Orchis militaris	Flowering Plants												considered threatened (rare, vulnerable, in danger) at national level
Zannichellia palustris	Flowering Plants												characteristic of the biotope
Potamogeton pusillus	Flowering Plants												characteristic of the biotope
Potamogeton pectinatus	Flowering Plants												characteristic of the biotope

Potamogeton compressus	Flowering Plants											charac teristic of the biotop e
Potamogeton crispus	Flowering Plants											charac teristic of the biotop e
Sparganium emersum	Flowering Plants											charac teristic of the biotop e
Apodemus microps	Mammals											consid ered threat ened (rare, vulner able, in dange r) at nation al level
Corvus corone cornix	Birds											charac teristic of the biotop e
Motacilla flava cinereocapilla	Birds											migrat ory on the site
Motacilla flava feldegg	Birds											migrat ory on the site

Motacilla flava thunbergi	Birds												migratory on the site
